

Salente InductPro1

Induction cooker you can always have by your side

It takes up almost no space, but it can cook almost anything. What are we talking about? About Salente InductPro1 single-plate induction cooker which boasts a compact and ultra-thin design (only 4.5 cm high), so it can easily fit even into the smallest kitchen, cottage or caravan. You can simply cook your favourite homemade dishes anywhere you have a socket available.

Temperature under the control

Every dish requires different approach – sometimes you just need gentle heating, sometimes you need real heat. That's why Salente InductPro1 offers you 10 temperature levels (ranging from 60 to 240 °C) and 10 power levels (up to 1800 W). And if you are in a hurry, you can rely on the Boost function which turns on the maximum power for 30 seconds. The reliable operation of this compact kitchen appliance is also ensured by self-diagnosis (monitoring possible problems with the display indication), or the fact that the operating and cooking are controlled by a top-notch microprocessor.

Cook wisely and safely

With this single-plate induction cooker, you can use pots with a diameter of 12 to 26 cm, and the appliance automatically recognizes the exact size of the pot or pan. In addition, it automatically switches off when you lift the pot from the plate, so there is no risk of wasting energy or unwanted overheating (moreover, the cooker also switches off after 2 hours of inactivity). The safety features are really well thought out there – as well, the appliance is provided with the rubber anti-slip feet for perfect stability and five-fold protection which includes elements that prevent overheating.

Specifications:

- Single-plate design
- Unique multifunction rotary control for quick adjustment of temperature, power and time, as well as switching the cooker on and off
- Ultra-slim compact design (only 4.5 cm high)
- High 90% efficiency of electromagnetic induction saves both energy and time (up to 50% energy savings and 60% time savings compared to conventional cookers)
- Instant power without waiting or lengthy preheating
- Glass-ceramic surface with a seamless, smooth finish for quick and easy cleaning
- Prevents food from burning onto the cooktop thanks to indirect heating (only the cookware is heated, not the cooktop surface)
- 10 temperature settings (60–80–100–120–140–160–180–200–220–240 °C)
- 10 power settings (200–350–500–650–800–1000–1200–1400–1600–1800 W)
- Durable buttonless touch controls
- Suitable for cookware with a diameter of 12–26 cm
- Microprocessor-controlled operation and cooking
- Automatic detection of induction-compatible cookware
- Automatic cookware diameter detection
- Automatic shut-off when cookware is removed from the cooking surface
- Boost function for maximum power output for 30 seconds
- Milk heating function to 60 °C with temperature maintenance for 20 minutes
- Five-level safety protection
- Automatic shut-off after 2 hours of inactivity
- Child lock for locking the control panel
- Large, high-contrast LCD display (80 × 24 mm)
- Timer with automatic shut-off after the selected time has elapsed
- Timer setting range: 0–180 minutes in 1-minute increments
- Self-diagnostic system monitoring display operation
- Non-slip rubber feet
- European certifications: LVD, EMC, RoHS
- Rated power: 1800 W
- Rated current: 8 A
- Rated voltage: 220–240 V
- Rated frequency: 50/60 Hz
- Power cord length: 1.5 m
- Dimensions (W × D × H): 29.9 × 36.3 × 4.5 cm
 - Weight: 2.2 kg
