1. 8. Icons and symbols

Learn about the icons and symbols on the screen.

Icons   Function

- Your phone will not ring when receiving a call

- Your phone will vibrate when receiving a call

- Flight mode activated

- Your phone is connected to a GSM network. The more bars are shown the better the reception is

- Your phone is connected to network

- Downloading data

- Uploading data

- Call in progress

- You have a missed call
- New SMS or MMS

- The bars indicate the battery level

- WiFi activated

- Connected to PC

- Bluetooth is activated

- The headset is plugged into the phone

- The alarm clock is activated

- Indicates the memory card is in use

- Error occurred or caution required

- FM radio turned on in the background

- USB debugging connected

2. Getting started

Please read the safety instructions in the "Safety & Precaution" section before use.

2. 1. Assembling and Charge

2. 1. 1. Insert SIM card

Follow the steps below to insert your SIM card. Remember to turn off your mobile phone before removing the back cover.

1) Remove the back cover
2) Take out the battery
3) Insert the SIM card.

   Note: Based on the default settings of your phone, it will connect 3G network by SIM1 directly. Also you can enter into Settings > Wireless and networks > Mobile networks > 3G service to get your personal settings

4) Install the battery
5) Replace the back cover

2. 1. 2. Charge the battery

A new battery is partially charged. The battery icon in the upper-right corner shows the battery level of charging status.

Tips:
- *You can use the phone while it is charging*
- *Keeping the charger plugged to the mobile phone when the battery is fully charged will not damage the battery. The only way to turn off the charger is to unplug it, so it is advisable to use an easily accessible power socket*
- *If you do not intend to use your phone for several days, we recommend that you remove the battery*
- *If a fully charged battery left unused, it will lost its charge over time*
- *If a battery is being used for the first time or the battery has not been used for a prolonged period, it may take longer time to recharge*

2. 2. Insert a microSDHC card (memory card)

2. 2. 1. Insert a memory card

You can expand the memory of your phone and store more additional multimedia files by adding a microSDHC card.

Your device accepts memory cards with maximum capacities of 32 GB.

1) Remove the back cover
2) Align your microSDHC card with the slot. Put it in place

2. 2. 2. Remove the memory card

Ensure that the phone is not currently accessing the memory card. Before removing a memory card, first unmount it for safe removal.

1) In Idle screen, select > Settings > Storage > Unmount SD card
2) Push the memory card gently until it disengages from the phone
3) Remove the memory card

Note: Do not remove a memory card while the device is transferring or accessing information to prevent corrupting or damaging the files in the memory card.

2. 2. 3. Format the memory card
Formatting your memory card on a PC may cause incompatibilities with your device. Format the memory card only on the device. In Idle screen, select > Settings > Storage > Erase SD card

Note: Before formatting the memory card, remember to make backup copies of all important data stored on your device. The manufacturer's warranty does not cover loss of data resulting from user actions.

2. 3. Personalize your phone

2. 3. 1. Time and Date
Change the settings to control how time and date appears on your device:
- **Automatic date and time**: Set to receive time information from the network and update the time and date automatically
- **Automatic time zone**: Set to receive time zone information from the network when you move across time zones
- **Set date**: Set the current date manually
- **Set time**: Set the current time manually
- **Select time zone**: Select a time zone
- **Use 24-hour format**: Set to show the time in 24-hour format or 12-hour format
- **Date format**: Select a date format

Tip: If the battery remains fully discharged or removed from the device, the time and date will be reset

2. 3. 2. Set a screen lock
You can lock your device by activating the screen lock feature. Select > Settings > Personal > Security > Screen lock:
- **None**: Disable the screen lock
- **Slide**: Choose slide to unlock the screen
- **Pattern**: Draw a pattern to unlock the screen
- **PIN**: Unlock the screen by enter the PIN code
- **Password**: Create your private password to unlock the screen

2. 3. 3. Lock your SIM or USIM card
You can lock your phone with the PIN that is supplied with your SIM or USIM card.
1) In the application list, select Settings > Security > Set up SIM card lock > Lock SIM card
2) Select the SIM or USIM card, enter your PIN and select OK

Note: If you enter an incorrect PIN too many times, your SIM or USIM card will be blocked. You must enter a PIN unlock key (PUK) to unblock the SIM or USIM card.
If you block your SIM or USIM card by entering an incorrect PUK, take the SIM or USIM card to your service provider to unblock it

2. 4. Apps
You can download a wide variety of free and paid apps ranging from productivity apps, entertainment, to games from the Android Market.

2. 4. 1. Access applications
- Scroll left or right to another screen, select an application
- On the Home screen, tap ⊞ to access the application list
- Press ⬜ to return to the previous screen, press ⌂ to return to the Home screen
- Access recently-used applications: Press and hold ⌂ to view the applications you have accessed recently

Your device has a built-in motion sensor that detects its orientation. If you rotate the device while using some features, the interface will automatically switch to landscape view. To set the interface to keep the orientation when you rotate the device, select Settings > Display > Auto-rotate screen.

2. 4. 2. Download applications from Android Market
Based on the Android platform, your device's functionality can be extended by installing additional applications. Android Market provides you an easy and quick way to shop for games and mobile applications.

1) **Install an application**
   - In Idle mode, open the application list and select Market
   - Select Accept when the terms and conditions appear
   - Search for a file or application and download it
   - *Note: Download and install only apps that you trust*

2) **Uninstall an application**
   - From the Android Market home screen, select My apps
   - Select the item you want to delete
   - Select Uninstall > OK

2. 4. 3. Download files from the web
When you download files or web applications from the web, your device saves them in a memory card.

Note: Files you download from the web can include viruses that will damage your device. To lessen your risk, only download files from sources you trust. Some media files include Digital Rights Management to protect copyrights. This protection may prevent you from downloading, copying, modifying, or transferring some files.
To install applications downloaded from websites other than Android Market, you must select Settings >Applications >Unknown sources >OK.

1) **Synchronize data** - You can synchronize data with various web servers and back up or restore your data. Once the synchronization is completed, your device stays connected to the web. If any change is made on the web, the updated information will appear on your device and will automatically begin synchronization, and vice versa
   Tips: This feature may be unavailable depending on your region or service provider

2) **Set up a server account**
   - In Idle mode, open the application list and select Settings > Accounts & sync
   - Select Add account >an account type
   - Follow the on-screen instructions to complete the account setup. For online community services, such as Facebook or MySpace, enter your user name and password and select Log in

3) **Activate automatic sync**
   - In Idle mode, open the application list and select Settings>Accounts & sync
   - Select Auto-sync
   - Select an account
   - Select the applications you want to synchronize
   - *Note: To exclude applications from automatic synchronization, clear the check boxes next to the applications you want*

4) **Synchronize data manually**
   - In Idle mode, open the application list and select Settings > Accounts & sync
   - Select an account
   - Select Sync now. Your device will start synchronizing the data you set for synchronization

3. Basic function

3. 1. Calls
Learn to use calling functions, such as making and answering calls, using options available during a call or customizing and using call-related features.

3. 1. 1. Make a call
   1) In the application list, tap 📞
   2) Dial the number directly or choose one number from the filtered list that have matching digits
   3) Make a voice call or a video call
   4) Tap to end the call 📞

Tips: The phone dialer's Smart dial features makes it quick and easy for you to make a call. Simply enter the phone number or first few letters of the person's name you want to call. Smart dial automatically searches and filters your stored contacts and the phone numbers from the call history.

Note: For international calls, long press 0 to enter the "+" sign for the international prefix. It is illegal in many areas to record a call without permission. Always ask the other party for permission before recording a call.

5. 3. 1. Share your files
You can share your photos, audio or video files with others via MMS, E-mail or Bluetooth.
1) Tap to open your files
2) Tap , and select photos, audio or video files you want to share
3) Tap and select Share in option list

5. 3. 2. Manage your files
You can copy, move or delete a file in a folder
- Open a file, tap to create a new folder
- Tap , select the file or folder

- Tap ⧉ , copy the file
- Tap ⋮ , paste/cut/rename the file
- Tap 🗑 , delete files

5. 3. 3. Search
  1) In the application list, tap 🔍
  2) Enter a keyword and select
  3) Select a search result

5. 4. Calculator
Learn to perform calculations with your phone.
  - Use the keys on the screen to perform basic calculations (scroll the screen to view the scientific calculator)
  - Press ⬒ > Clear history to clear the calculation history

6. Connections

6. 1. Bluetooth
Your phone can connect to a compatible Bluetooth device for exchanging data.

6. 1. 1. Turn on/off Bluetooth
  1) From the Home screen, tap 📶 > Wireless & networks > Bluetooth
  2) Select or clear the Bluetooth check box

Note: Turn off Bluetooth when not in use to save battery power, or in places where using a wireless device is prohibited, such as on board an aircraft and in hospitals

6. 1. 2. Receive data via Bluetooth
  1) Turn on the Bluetooth firstly, then tap 📶 > Wireless & networks > Bluetooth to make device visible
  2) Then select Search for devices
  3) Select a device, Enter a pair password and select Accept to pair with the other device
  4) On the receiving device, accept the file

Note: Some devices, especially headsets or hands-free car kits, may have a fixed Bluetooth PIN, such as 0000. If the other device has a PIN, you must enter it.
Received data is saved to the Bluetooth folder. If you receive a contact, it is automatically saved to the phonebook.

6. 1. 3. Send data via Bluetooth
  1) Select a file or item, such as a contact, calendar event, memo, or media file, from an appropriate application or My files
  2) Select an option for sending data via Bluetooth
  3) Search for and pair with a Bluetooth-enabled device

6. 2. Wi-Fi
Learn to use your device's wireless networking. The availability and strength of the Wi-Fi signal will vary depending on objects, such as buildings or simply a wall between rooms, the Wi-Fi signal has to pass through.

6. 1. Turn on Wi-Fi and connect to a WIFI
📶

1) From the Home screen, tap   > Wireless & networks > Wi-Fi
2) Turn Wi-Fi on
3) Detected Wi-Fi networks will be listed in the Wi-Fi networks section
4) Choose the Wi-Fi network you want to connect to, tap Connect
5) If you selected a secured network, you'll be asked to enter the network key or password

Tips: If the wireless network that you want is not listed, tap Add Wi-Fi network to manually add it

6. 3. VPN
Learn to create virtual private networks (VPNs) and connect

6. 3. 1. Set up a VPN profile
1) In the application list, tap   > Wireless & networks > VPN > Add VPN network
2) Enter a name for the VPN server and select a VPN type

3) Change the options as required
4) When you are finished, select Save

Tips: The options available may vary depending on the VPN type. Your device should already be configured with Internet access. If you have trouble accessing the Internet, you must edit the connections. If you are not sure what information to enter, ask your VPN administrator.
To use this feature, you must activate the screen lock feature.

6. 3. 2. Connect to a VPN
1) In the application list, tap   > Wireless & networks > VPN
2) Select a private network
3) Enter the user name and password, and then select Connect

6. 4. Mobile network sharing
Learn to set your device as a wireless modem or wireless access point for PCs or other devices, and share your device's mobile network connection.

6. 4. 1. Share your mobile network via WIFI
1) In the application list, select Settings > Wireless and network > Tethering & portable hotspot
2) Select Portable Wi-Fi hotspot to activate the WIFI tethering feature
3) Select Configure Wi-Fi hotspot to configure network settings to use your device as an access point:
   - **Network SSID:** View and edit the device name that will be shown to external devices
   - **Security:** elect the security type
4) When you are finished, select Save
5) From another device, locate your device's name in the available connection list and connect to the network. Your device shares the mobile network connection on another device

6. 4. 2. Share mobile network via USB
1) Using a USB cable, connect the multifunction jack on your device to a PC
2) In the application list, select Settings > Wireless and network >Tethering & portable hotspot
3) Select USB tethering to activate the USB tethering feature. Your device shares the mobile network connection on your PC.
4) To stop sharing the network connection, tap to turn off USB tethering.

Tips: The sharing method for the network connection may differ depending on the PC's operating system.

6. 5. Internet
Learn to access and bookmark your favorite web pages.

6. 5. 1. Browse a webpage
1) In the application list, tap
2) To access a specific webpage, select the URL field, enter the web address
3) Start to view the WebPages

While browsing a webpage, access the following options:
- To zoom in or out, place two fingers on the screen and slowly spread them apart or pinch them together

- To open/close the window, tap
- To bookmark the current webpage, press > Add bookmark
- To view your download history, press > Downloads
- To change the browser settings, press > Settings

6. 6. PC connections
Learn to connect your phone to a PC with a USB cable in USB connection modes
1) Connect your phone to a computer with a USB cable
2) When connected, select Turn on USB storage
3) You phone act as a removable disk. If you insert a memory card in the device, you can also access the file directory of the memory card by using the device as a memory card reader
4) Copy files from the PC to the memory card
5) When you are finished, select Turn off USB storage

6. 7. Sync
Tap > Accounts & sync to finish setting online account before sync.

6. 7. 1. Synchronizing with a Google Account
1) Tap > Accounts & sync > Add account
2) Follow the onscreen instructions to sign in to an account or create a new account
3) If select Background data, apps can send and receive online account information even if you are not currently using them
4) If select Auto-sync, apps can use the sync schedule defined in the account settings. If this is cleared, you will need to sync accounts manually

7. Settings

7. 1. Wireless & Networks

Function	Definition
SIM management	Set the dual SIM card information/set the SIM card for data connection, call, message
WiFi	Activate the WiFi feature to connect to a WiFi AP and access the Internet or other network devices
Bluetooth	Activate the Bluetooth feature to exchange information over short distances
Data usage	Keep track of your data usage amount, and customize the settings for the limitation
Airplane mode	Activate Flight mode to disable all wireless functions on your device. You can use only non-network features
VPN	Set up and manage virtual private networks (VPNs)
Tethering & portable hotspot	- Set to use your device as a wireless modem by making a USB connection with a computer - Set to use your device as a wireless access point for other devices - Activate the Bluetooth tethering feature to share your mobile network with computers via Bluetooth
Mobile networks	- Set to use data connections on any mobile network - Set to use data connections when you are roaming
GPRS transfer prefer mode	Turn on the GPRS data transmission

7. 2. Device

Function	Definition
Audio profiles	- Select the profiles of the phone - Set the volume and type for ringtone, alarm and notification
Display	Change the settings to control the display and backlight on your device
Storage	View memory information for your device and memory card. You can also format the memory card
Battery	View the amount of battery power consumed by your device
Apps	Manage running applications, move applications to or from the storage card, and install or uninstall programs

7. 3. Personal

Function	Definition
Account & sync	- Change the settings for the auto sync feature or manage accounts for synchronization - Log in or out of your social network accounts, Google Account and Exchange ActiveSync account
Location services	Select the sources to use when determining your location
Security	Set a screen lock or manage the credential storage
Language & input	Set the operating system language and region. You can also set onscreen keyboard options
Reset	Reset your settings to the factory defaults and delete all your data

7. 4. System

Function	Definition
Date & time	Set the date and time, time zone, and date or time format
Schedule power on/off	Set the time to power on/off automatically
Accessibility	Use these settings when you've downloaded and installed an accessibility tool, such as a screen reader that provides voice feedback. You can turn accessibility functions or services on or off
Developer options	Change the settings for application development
About phone	View different information about the phone, such as the battery, legal information, model number, software version, baseband version and build number

8. Safety & Precaution

8. 1. Precaution

Keep your phone away from small children
Keep your phone and all accessories out of the reach of small children. Small parts may cause choking or serious injury if swallowed.

Radio Waves
Your phone transmits/receives radio waves in the GSM frequency.

Switch off your phone...
- In an aircraft. The use of mobile phones in an aircraft may be dangerous for the operation of the aircraft, disrupt the mobile phones network and may be illegal.
- In hospitals, clinics, other health care centres and anywhere else where you may be in the close vicinity of medical equipment.
- In areas with a potentially explosive atmosphere (e.g. petrol stations and also areas where the air contains dust particles, such as metal powders).
- In a vehicle transporting flammable products or a vehicle powered by liquefied petroleum gas (LPG).
- In quarries or other areas where blasting operations are in progress.

Your mobile phone and your car
Avoid using your phone while driving and obey all regulations that restrict the use of mobile phones while driving. Use hands free accessories to increase your safety when possible. Ensure that your phone and car kit do not block any air bags or other security devices fitted in your car

Handle your phone carefully and sensibly
For the optimal and satisfactory operation of the phone you are recommended to use the phone in the normal operating position.
- Do not expose your phone to extreme temperatures
- Do not immerse the phone in any liquid; if your phone is damp, switch it off, remove the battery and let them dry for 24hrs before using them again
- To clean the phone, wipe it with a soft cloth
- In hot weather or after prolonged exposure to the sun (e.g., behind a window or a windscreen), the temperature of your phone's casing might increase. Be very careful in this

case when picking up your phone and also avoid using it with an ambient temperature over 40° C

Protect batteries from damage
You should only use EVOLVEO accessories, as the use of any other accessories may damage your phone and may be dangerous, and will make all guarantees for your EVOLVEO phone null and void. The use of an unspecified type of battery may also cause an explosion.

9. Troubleshooting

The phone does not switch on
Remove/reinstall the battery. Then charge the phone until the battery icon stops scrolling. Unplug the charger and try to switch the mobile on.

The display shows BLOCKED when you switch on the phone
Somebody tried to use your phone but didn't know the PIN code nor the unblocking code (PUK). Contact your service provider.

The display shows IMSI failure
This problem is related to your subscription. Contact your operator.

Your phone doesn't return to idle screen
Long press the hang-up key or switch off the phone, check that the SIM card and the battery are installed correctly and switch it on again.

The network symbol is not displayed
The network connection is lost. Either you are in a radio shadow (in a tunnel or between tall buildings) or you are outside the network coverage area. Try from another place, try to reconnect to the network (especially when abroad), check that the antenna is in place if your mobile has an external antenna, or contact your network operator for assistance/information.

The display doesn't respond (or the display responds slowly) to key presses
The display responds more slowly at very low temperatures. This is normal and does not affect the operation of the phone. Take the phone to a warmer place and try again. In other cases please contact your phone supplier.

Your battery seems to over heat
You might be using a charger that was not intended for use with your phone. Make sure you always use the EVOLVEO original accessory shipped with your phone.

Your phone doesn't display the phone numbers of incoming calls
This feature is network and subscription dependent. If the network doesn't send the caller's number, the phone will display Call 1 or Withheld instead. Contact your operator for detailed information on this subject.

You can't send text messages
Some networks don't allow message exchanges with other networks. First check that you have entered the number of your SMS centre, or contact your operator for detailed information on this subject.

You can't receive and/or store JPEG pictures
A picture may not be accepted by your mobile phone if it is too large, if its name is too long, or if it doesn't have the correct file format.

You feel that you have missed some calls
Check your call divert options.

When charging, the battery icon shows no bar and the outline is flashing
Only charge the battery in an environment where the temperature does not go below 0°C (32°F) or above 50°C (113°F). In other cases please contact your phone supplier.

The display shows SIM failure
Check that the SIM card has been inserted correctly. If the problem persists, your SIM card may be damaged. Contact your operator.

When attempting to use a feature in the menu, the display shows NOT ALLOWED
Some features are network dependent. They are only available, therefore, if the network or your subscription supports them. Contact your operator for detailed information on this subject.

The display shows INSERT YOUR SIM CARD
Check that the SIM card has been inserted correctly. If the problem persists, your SIM card may be damaged. Contact your operator.

Your phone doesn't work well in your car
A car contains many metallic parts that absorb electromagnetic waves which can affect the phone's performance. A car kit is available to provide you with an external antenna and enables you to make and receive phone calls without handling the handset.
Note: Check with the local authorities whether or not you are allowed to use the phone while driving.

Your phone is not charging
If the battery is completely flat, it might take several minutes of pre- charge (up to 5 minutes in some cases) before the charging icon is displayed on the screen.

The picture captured with the phone camera is not clear
Make sure that the camera lens on both sides is clean.

The warranty DOESN´T APPLY to:
- installing a different firmware than the one that was in the phone EVOLVEO installed, or firmware which can be downloaded manually or automatically from the device menu or ROOT Android system
- electromechanical and mechanic damage of the phone caused by inappropriate using (e. g. broken display, broken front cover or rear cover, damaged power microUSB connector etc.)
- damage caused by the natural elements as fire, water, static electricity, higher temperature etc.
- damage caused by unauthorized repair
- deliberate damage

Disposal
The symbol of crossed out container on the product, in the literature or on the wrapping means that in the European Union all the electric and electronic products, batteries and accumulators must be placed into the separate salvage after finishing their lifetime. Do not throw these products into the unsorted municipal waste

Settings, manuals and other information relating to the products **EVOLVEO** can be found on www.evolveo.eu.
