

# EVOLVE® Jade 2 LTE

Outdoor antenna for digital and analog TV reception

## INTRODUCTION:

This is a special designed new concept antenna for digital indoor and outdoor analog and terrestrial HDTV broadcasting reception. It is the best solution for home reception and digital portable TV reception. Complete accessories are included for wall or pole mounting. With the anti-UV and water proof housing, it can be used both indoor and outdoor.

## Technical Data:

- Frequency Range: 470-790MHz
- Receiving range: UHF
- Antenna Gain : 48dBi Max
- Max. Output level: 100dB $\mu$ V
- Impedance: 75  $\Omega$
- Power Supply: DC 12V 50mA
- Noise figure: <4.5dB

## Included in Package:

Before start your installation, please check the contents.

1. Antenna main unit
2. AC/DC adapter
3. Power insert
4. mounting accessories
5. Coaxial cable

## Product Features:

- Anti-UV coating and waterproof design.
- Lightweight, compact size and easy to install.
- For both analog and digital TV signal reception
- Built-in high gain and low noise preamplifier
- Powered by DTV set-top box or included separate power adapter.
- Specially Compatible with HDTV of various digital terrestrial (DVB-T, ISDB-T, DTMB, ATSC) signal.

This antenna can be used both indoor and outdoor, with the included mounting accessories, it can be mounted on the pole.

use the pole mounting accessories to fix the antenna on the pole (the J-pole is not included in the accessories.)

Installation: Please take following installation instruction for reference.

Installation 1: Connected Through digital converter box

Installation 2: Directly connected to HDTV

Note: After the antenna mounting and installation is finished, please adjust the antenna in the best position that can get clear TV picture, then fix the antenna, organize the coaxial cable for neat, tidy and safety,

## Operation Instruction:

Note: For the best reception, please check the following conditions

1. Keep the antenna away from the sources of interference: keep the antenna away from those big power consumption devices, such as air conditioner, elevator, hair dryer and microwave oven...etc.
2. Place the antenna near windows when use the antenna in indoor environment.
3. Install the antenna as high as possible: in digital terrestrial reception, if there are some interceptions between antenna and transmission tower, it will cause the signal loss temporarily. So if the antenna is installed as high as possible, those interceptions will be reduced.
