

MANUAL **EVOLVEO**

MODEL VERSION / DATE

**Wireless 360°
ceiling PIR motion
sensor for Sonix** II. / 9. 5. 2024

EN

Thank you for choosing us, Please carefully read this user manual before operation and installation.

Cautions

-  Please read user manual carefully before using this product.
-  Non-professional staff please do not dismantle the product by yourself.
-  Please start the product in environment which is marked in this user manual, in case of damage.

I. Brief Description

This product is a wireless ceiling PIR motion sensor (hereby short name as sensor), it is able to detect infrared ray from human body, and make accurate analysis according to the environment, precisely and stably alarm to the motion of human body. This product can work together with our alarm hosts, suitable for family, factory, shopping mall, warehouse, office etc.

Features

- ★ Motion detection, infrared sensor.
- ★ Wireless communication, real-time report.
- ★ Battery inspection, low power alert.
- ★ Quick installation, easy to use.

II. Product Understanding

III. Product installation

• Installation

Side look

Fig(3)

Look up

Fig(4)

• Caution

Away from heat;

Donnot install outdoor;

Away from the straight sunshine;

Donnot install near the waving curtain.

Fig(5)

• **Suggestion:** Install it to places where intruder may break.

Note: The detection area is a 5m/360° sector.

Fig(6)

IV. Test: (Suggest to test it per 3 months)

Please test by yourself after installation to make sure it covers all areas you want to protect.

VI. Function Descriptions

1. Mode setting: (Corresponding the PCB)

Note: Corresponding to the S1/S2 switch on PCB board.

Default Mode: N

| S1 | S2 | MODE | Function Descriptions |
|----|----|--------|--|
| 0 | 0 | / | No |
| 1 | 1 | T | Testing Mode(T): Every triggering is effective |
| 0 | 1 | 60S(N) | Normal Model(N): After one effective triggering, in 1 minute other triggering will no use. The 2nd triggering only works after 1 minute |
| 1 | 0 | 60S(S) | Smart Mode(S): After one effective triggering, if trigger it again in 1 minute, the detection time will be cleared, and restart the time, only after 1 minute the triggering will be effective |

2. Heartbeat function: This PIR detectors will report status to center every 4 hours.

3. Battery in low voltage: When the built-in battery voltage is lower than 2.55V, the sensor will send a

low-voltage alarm signal to alarm host automatically (only one time).

4. LED status instruction:

Normal: When trigger, the sensor will send wireless signal and the indicator flash one time.

Battery in low voltage: When trigger, the sensor will send wireless signal and the indicator flash twice.

VII. Parameters

1. Power supply: DC3V, 2 pcs AA battery
2. Standby current: $\leq 20\mu A$
3. Alarm current: $\leq 50mA$
4. Operating humidity: $\leq 50\%RH$
5. Detection distance/angle: 5m/360°
6. Encoding modes: 2262
7. Wireless frequency: ASK 433.92MHz/868.35MHz can be customized
8. Wireless emission distance: $\leq 70M$
9. Operation temperature: $-10^{\circ}C \sim +35^{\circ}C$ (5% - 75% & RH)
10. Dimension: 82x82x42mm

VIII. Packing List

- Motion detector × 1
- Self-tapping screw × 2
- Manual × 1

Disposal

The symbol of crossed out container on the product, in the literature or on the wrapping means that in the European Union all the electric and electronic products, batteries and accumulators must be placed into the separate salvage after finishing their lifetime. Do not throw these products into the unsorted municipal waste

DECLARATION OF CONFORMITY

Hereby, the company Abacus Electric, s.r.o. declares that the EVOLVEO wireless 360° ceiling PIR motion sensor for Sonix is in compliance with the requirements of the standards and regulations, relevant for the given type of device.
