Table of Contents

Dear Customer,
Thank you for choosing an **EVOLVEO** mobile phone.

IMPORTANT NOTICE

🚗	If you are driving a motor vehicle, use a headset with a microphone when making calls. In urgent situations, park your car on the side of the road so you can continue an important call.
✈️	Switch off your phone when boarding the aircraft and do not switch it on on board.
➕	Be very careful when using your phone near devices such as pacemakers, hearing aids or other medical devices, as the phone may interfere with their operation.
🔧	Do not attempt to disassemble the phone yourself. If you have any problems with your phone, ask

	your dealer or service provider for help.
	Do not connect your phone to the charger unless the battery is inserted.
	Protect your phone from the effects of magnetic fields. Do not bring it close to magnetic elements such as credit cards.
	Protect from liquids. If your phone gets liquid or corrosion, remove the battery immediately and ask your dealer for help.

CALLING

In standby mode, enter the phone number and press the "call" button to start the call.
Press the End Call button to end or reject an incoming call.

REPORT

When you enter the menu:

- Write a message
- Inbox messages
- Unsent messages
- Concepts
- Sent messages
- Secure inbox messages
- Templates
- Settings
- Message capacity

Message capacity is determined by the maximum storage capacity of the phone and external SIM cards. You can check the memory status of your SIM card or phone.

CONTACTS

Up to 250 phone numbers can be stored in the phonebook, the capacity of the contacts on the SIM card depends on the phone operator, please contact your phone operator for information.

1. Speed dialling

Set up phone numbers that can be speed dialed by long pressing the 2-9 buttons.

Select "Menu" and use the down button to find the "Phonebook

Select "Options/Further/Fast Dial" and set the numbers 2-9: It is possible to set and store 8 speed dial numbers corresponding to numbers 2-9.
After activating Speed Dial in standby mode, press and hold one of the 8 alphanumeric buttons and your phone will dial the corresponding phone number from the speed dial list.

CALL RECORDS

From the main menu, you can access Call History, which shows missed calls/dialled numbers/incoming calls/rejected calls and call duration records.

MULTIMEDIA

1. Camera

Press the 'Up' button button to take photos with the built-in camera. You can also use the same button to adjust the camera settings. If you run out of memory, delete some pictures or other files in the "File Manager".

The image can be viewed in the camera options and can be edited using "Camera Settings" and "Image Settings".

2. Videorekordér

Press the camera 'Up' button button to start recording the video. The length of the recording depends on the time limit and the capacity of the memory card. After entering the Options menu, you can select the following settings: Switch to Camera, Camera Settings, Video Settings and Storage.

3. MP3

The following legend will appear on the
screen: List, Back. The list will show the
names in stock that you have uploaded.
Select one of them to enter the list:
Select an option from the detailed list to
play, update the list or change settings.
If there are no songs in the list, you only
see Update List or Settings.
Press the **Up and Down** buttons to go to
the previous or next track.

Numeric button 5: To stop and play

Volume: Press the volume button to
change the playback volume.

4. Video player

Call up the video player. Press the call
button to open Options.

5. FM radio

You can select the following options:

Press the FM radio switch to turn on or off.

Press the Volume button to adjust the playback volume.

Use **the** Up-Down **buttons** to start the automatic station search

Station list: displays a list of manually or automatically searched stations.

Settings: The "Background Playback" and "Speaker" functions can be switched on and off.

Recording: Use the "Record" function to record the FM programme.

6. Recording equipment

Enter the voice recorder, press the Options button to select New Recording, and you can choose one of the options below: New entry, Play, List.

7. Photo gallery

With this function, you can select any image and press the call button to select the following options: Browse, Rename, Delete, etc.

SOS SETTINGS

You can turn the function on/off, set the number and the text of the SMS message.
SOS settings: Select "Menu"→ "Settings" → "SOS Settings", set "Status" to "On" and then set the SOS

number to numbers 1-5. You can also set the wording of the message.

Procedure: If the SOS function is switched on, a longer hold on the "SOS" button will activate the SOS function, which will proceed as follows:

A loud alarm will sound and an SMS will be sent to all emergency numbers with the following content: "Please help.".

The set emergency numbers will then start dialling, each number will be dialled three times.

The SOS call stops if any person answers the call or if no person answers the call after the third dial.

SETTINGS

1. Call settings

To set up a dual SIM card :

With this function you can adjust the SIM card mode "Two SIM cards", "SIM card 1 only ", "SIM card 2 only ", "Airplane mode".

Call forwarding: It includes five different settings - Forward always, Forward when unavailable, Forward when no answer, Forward when busy and Forward all data calls. Press Cancel to deactivate all call forwarding.

Call waiting: Activate or deactivate this feature, select to check the current

settings of this feature.

Call blocking: Blocking numbers you dial yourself or that call you.

Advanced settings:

Automatic redial When you activate this feature, your phone will automatically redial the number every time a call is dropped or rejected.

Warning: Some features require operator support.

2. Phone settings
