EVOLVEO StrongPhone G5

High-performance rugged 4G Smartphone with dual camera

EVOLVEO StrongPhone G5 is a rugged phone with IP68 certification and therefore ready for use in environments in which a regular phone would not last. It resists water, dust, mud and withstands falls and impacts. A high-quality dual camera will help you take pictures of all of your outdoor activities or family and friends.

Mediatek Quad Core Processor

The Mediatek quad-core processor overcomes any competitive energy efficient solutions. It is based on the powerful, but energy saving ARM Cortex A53 microarchitecture. The fast 64-bit processor runs at 2.0 GHz and provides enough power for your favourite applications and games.

Free replacement of a broken display for 12 months

The EVOLVEO StrongPhone G5 mobile phone is provided with a free extended warranty on a broken display. The warranty is provided in a case of a broken display or a top glass of the display. The warranty does not cover other damages to the display or the top glass of the display, e.g. scratches or abrasions. The display will be repaired for free in authorized EVOLVEO service centres after submitting a proof of purchase. The replacement can be claimed for a period of 12 months from the purchase of the mobile phone. This extended warranty does not change or limit the normal 24-month warranty.
