Overview of the Most Important Functions

Framed texts are provided in the following operating steps.
These frames indicate texts which can appear in the display of the mobile phone.

◆ Message

1. The **Messages** menu can be used to write text messages (also called "SMS"), view, answer, forward and delete received and sent text messages, write draft messages and make further settings.
2. The maximum storage capacity built-in mobile phone is 50pcs. External capacity from SIM cards depends on the operator.

◆ Phonebook

Under this menu, you can make edit of contacts, like add new contact, move, copy and delete exist contacts. Also you can set speed dials for the Number 2-9.

To add a contact to the phone book

1. Press the left soft-key to open the main menu, or directly press **Names** on the home screen
2. Navigate to the **Phonebook** → **Add new contact** menu options.
3. Select a storage location (**To SIM** or **To phone**).
4. Enter the name and phone number.
5. Press the left softkey and select **Options** →**Save.** or press the central button to save directly.

To view or search a contact.

1. Press the left softkey to open the main menu, or directly press **Names** on the home screen.

2. Navigate to the **Phonebook**, then you will see the contact list.

To set speed dial.

If you want to dial certain phone numbers even more quickly, you can assign the respective phone book entries to digit keys 2 to 9.

1. Press the left softkey to open the main menu.
2. Navigate to **Phonebook** → **Options** → **Phonebook settings** → **Speed dial** → **Status** → **On.**
3. Press **Set numbers** → **Edit** to assign speed dialing numbers to contacts who are already stored in the phone book.

◆ Call logs

Here you can view as call history and call settings.

Call history

You can press left softkey or central button to enter into call history under call logs menu. There is a list of your Missed calls, Dialed calls, Received calls, All calls. And you can press left soft-key or central button to get different options for them, e.g. **View**, **Call**, **Send text message**, **Save to phonebook**, **Add to Blacklist**, **Delete**.

Call Settings

You can press left softkey or central button to get the setting of each SIM card, like call waiting and call divert, also you can choose the answer mode and set blacklist.

Call waiting: Define whether a new, incoming call should be indicated by means of the call waiting signal while a call is already in progress.

1. Press the left softkey to open the main menu.

2. Navigate to **Call logs** → **Call settings** → **SIM 1 (SIM 2) call settings** → **Call waiting**
3. Select **Activate** or **Deactivate**, then the setting is saved.
4. You can check whether the service is available in **Query status**.

Contact your mobile phone provider if you want to enable the service. Please note that the range of functions available can vary according to the mobile phone provider.

Call divert:

Define whether and in what situations incoming calls to the mobile phone should be diverted to another, specified phone number.

1. Press the left softkey to open the main menu.
2. Navigate to **Call logs** → **Call settings** → **SIM 1 (SIM 2) call settings** → **Call divert**
3. Select the required call divert setting (Divert all voice calls, Divert if unreachable, Divert if no answer, Divert if busy, Divert all data calls.)
4. Select **Activate** → **To new number** which your calls should be diverted to.
5. Alternatively, **Activate** → **To Voice mail**

Confirm with **Options** → **Done** then the setting is saved.

◆ Blacklist

You can set up a blacklist containing up to 20 phone numbers. If you set this function, the phone numbers saved in the list can not call you. In this case, the caller automatically receives a busy signal. This function is useful, for example, if you want to prevent unwanted calls (such as sales calls or opinion polls). Adding a phone number to the blacklist

1. Press the left softkey to open the main menu.
2. Navigate to **Call logs** → **Call settings** → **Advanced settings** → **Blacklist** → **Reject numbers in blacklist** → **On.**
3. Enter the phone numbers you want to add to the blacklist.
4. Confirm with **Options** → **Done**, then the setting is saved.

◆ Setting Time and Date

1. Press the left softkey to open the main menu.
2. Navigate to the **Settings** → **Phone Settings** → **Time and Date** → **Set Time/Date** menu options.
