

# Microsoft® Internet Keyboard

Introducing Microsoft® Internet Keyboard—another sure hit from Microsoft. The safe advertising date for Microsoft Internet Keyboard is **September 30, 1999**.

## Primary headline

**Easy Internet access and control from your keyboard.**

## Secondary headline

**10 Hot Keys let you take control of your computing.**

## Tag line/descriptor

**One-Touch Access to the Internet and More**

## 25-word description

The Internet Keyboard gives you a high-quality design with the tools and easy Web access to help you work more efficiently.

## Features/benefit

- Get online with the push of a button, then browse right from your keyboard.
- Open your e-mail program to check messages with the E-mail Hot Key—a single keystroke is all it takes to access your electronic mailbox.
- Quickly perform common tasks such as Cut, Copy, and Paste with the help of Control Key Shortcut Labels.\*
- Get one-touch access to popular Windows® features such as My Computer or the Calculator. Or, customize these Hot Keys to launch your favorite programs, documents, or Web sites.
- Use the Sleep Hot Key to suspend your PC, then resume work later—without having to restart your computer.\*\*
- Use the palm rest to rest your palms or hands while not typing.
