Enhancements Implemented (2):

ID: DCSG00953521
Headline: Showing missing HBAs in BIOS post
Description Of Change: Core BIOS checks if user can perform configuration changes, if not then auto correction is made for the BIOS POST display. All the HBAs (Up to 4) are added depending on their discovery order. Since the Core BIOS updates the adapter list every time, a message Updating adapter list is shown every time to user.

ID: DCSG00995500 (Port Of EnhancementRequest DCSG00995323)
Headline: Add Sub System Device ID based controller name
Description Of Change: Added new string for the controller name based on Sub System Device ID.
